The University of Missouri-Columbia Campus Master Plan is an ongoing process that began in 1981 to create optimal efficiency and ambiance on the use of campus buildings and land. A campus planning committee includes faculty, staff, and students who advise the vice chancellor for Administrative Services on campus planning issues.

Since its inception, more than 20 public hearings on the plan have been held and the plan is under way. The committee interacts with campus faculties and departments to suggest new space needs and specific projects, with accompanying visual presentations and graphics. Progress reports are presented annually in open sessions on campus.

Committees and responses that help to shape the plan are always encouraged. At open forums this year will be held at noon, April 2, in the Reynolds Alumni Center.

A central concept of the master plan is to build on the tradition of the MU campus to create a unified, efficient environment that is inviting to students and faculty. The plan also focuses on the vitality of the MU campus, as it is the heart of MU's magnificent flora environment as a learning resource for the public at large. The plan also focuses on the vitality of the MU campus, as it is the heart of MU’s magnificent flora environment as a learning resource for the public at large.

As we enter the 21st century, there is an essential theme that we need to incorporate into our planning and design ideas for the campus—"connection." This theme is the hallmark of great campuses. For the creation of spaces that are inviting to people and leaders to interact in a collegial way. It is the linking of open spaces that works to unify the campus fabric. Academic, residential, and social functions are tied together by inviting pedestrian plazas that enhance campus vitality and intellectual exchange.

Objectives of the plan (see box at right) are intended to help design and planning concepts and propositions, and specific projects as they are developed. Objectives are consistent with the Board of Curators' 1981 policy statement, which also includes the goal of "maintaining and making more efficient and attractive the university's physical space."

The master plan objectives have helped to shape projects that have been completed and others that are under way. A project of interest is that, as part of the whole, it complements and reinforces teaching, research and planned projects. With the plan in place, civic amenities should blend with their surroundings as it is to appear to have been there from the start.

Accomplishments to date and upcoming planned objectives are shown on the inside map. Feel free to use this supplement to comment on the plan. Simply write wherever space is available and return to Ruth Tolle, chair, Campus Planning Committee, 135 Shane Hall. Readers' comments are encouraged.

PLANNING PRINCIPLES

PRIDE OF THE STATE: Exercise steady the functional potentialities of the campus as the state, nation and world.

UNIFORM VISUAL STYLE: Unify the campus while striving for red-tape in administrative concerns.

DIVERSITY WITHIN THE UNITY: Create and maintain campus setting that respects the diversity of people, programs and culture.

STRONG SPACE: Place: Make the campus a distinctive and memorable place all will remember the University, community and for the citizens of Missouri.

RESPET ARCHITECTURAL INTEGRITY: Design buildings to maintain the scale, materials and forms intended in the historic and climatic context of the campus.

RESPOND TO CLIMATE AND ENVIRONMENT: Design buildings and landscapes to be compatible with the university's regional environment and to conserve natural resources.

RECRUITMENT & RETENTION AIDE: Since the existence of our university's campus is tied to talent and make more efficient and attractive the university's physical space.

DEVELOPMENT: Provide appropriateness and adequate facilities — 2000-2000 for campus residents for facilities expansion in ways that conserve natural resources.

ENVIRONMENTAL QUALITIES OF CLOSEDNESS: Create campus functions in places that provide housing, shopping, social interaction.

FACILITIES AND ENVIRONMENT: Create campus settings that provide housing, shopping, social interaction.

RESPOND TO ACCESSIBILITY NEEDS: Continue the University's tradition of providing persons with disabilities an optimal access to educational and social interaction.

RESPECT NEIGHBORS: Campus to campus setting that respects the diversity of people, programs and culture.

REINFORCE THE UNIVERSITY MISSION: Organize functional plans so as to reinforce the University's educational mission.
Ellis Fischel Campus

- Ellis Fischel Cancer Center
- Green Building
- Allen Building
- South-Rusk Rehabilitation Center
- Ellis Fischel Guest House
- Ellis Fischel Hospital Expansion/Replacement
- Outpatient Clinics Expansion
- Possible Future Research Buildings

Columbia Regional Hospital

- Columbia Regional Hospital
- Keene Medical Building
- Health Pavilion
- Columbia Regional Engineering Building

Projects Recently Completed
1. Cornell Hall
2. Student Success Center
3. Virginia Avenue Parking Structure
4. Power Plant Capacity Addition
5. Green Tennis Center at Mizzou
6. Emergency Room Expansion

Projects in Design or Construction
9. Basketball Arena
10. Life Sciences Center
11. McKee Addition/Renovation
12. Student Recreation Center Expansion
13. Providence Road Pedestrian Overpass
14. Virginia Avenue Residence Halls & Dining Facility
15. Dalton Research Center Expansion/Renovation

Botanic Garden Projects
7. Hydrangea Collection
8. Jefferson Garden
16. Daylily Garden
17. Ericaceous Garden
18. Hosta Collection
19. Container Garden at South Jesse Plaza
20. Tiger Plaza

Existing Buildings
- Jesse Hall
- Hearnes Center
- Ellis Library
- Memorial Union
- Brady Commons
- Research Reator
- Hankel Building
- Agriculture Building
- Clydesdale Hall
- Student Recreation Center
- Reynolds Alumni Center

Projects in the Planning Stage
21. Engineering Building East Addition/Renovation
22. Ellis Library Addition/Renovation
23. Missouri Technology Park
24. Pedestrian Plaza/Mall
25. Veterinary Medicine Guest House
26. Second Phase Residence Halls
27. Pickard & Sociology Halls Expansion/Renovation
28. Medical Research Facility
29. Visitors Center
30. Performing Arts Center
31. Child Development Center
32. College Avenue Pedestrian Overpass
33. Arboretum
34. Virginia Avenue Residence Halls & Dining Facility
35. McKee Addition/Renovation

Botanic Garden Projects
16. Daylily Garden
17. Ericaceous Garden
18. Hosta Collection
19. Container Garden at South Jesse Plaza
20. Tiger Plaza

University Land, largely pedestrian but including service drives and small parking areas
